Key messages from our **CBIG-Screen Roundtable**

Improving Equity in Cervical Cancer Screening: A Policy Dialogue on Reaching Marginalised Communities

Co-hosted by MEP Cynthia Ní Mhurchú, EIUH & CBIG-SCREEN

On the 19th November 2025, we hosted the **CBIG-SCREEN Project Roundtable at the European Parliament in Brussels** — an exchange on advancing equitable cervical cancer screening across Europe. It brought together policymakers, cancer researchers, health professionals and civil society organisations.

The discussions and project outcomes highlighted:

- 1** Cervical cancer screening saves lives by finding it early - yet **only if everyone has access.**
- 2** **Information is key** - increase health literacy and train health professionals.
- 3** **Increasing uptake can cost less** overall because of savings in treatment costs - and it also saves lives
- 4** **Co-creation** and participation of vulnerable groups in **intervention** and **policy design** that respond to real-world issues and diverse settings.
- 5** Need for **reliable and transparent systems** to strengthen effective prevention strategies.

CBIG-Screen Roundtable

A heartfelt thank you to our inspiring speakers, engaged co-host Cynthia Ní Mhurchú and our wonderful audience – you made this event extraordinary. We look forward to building on this momentum together.
